Subject: Rollout schedule for Dimock reports

Maybe this would help.

Cindy -

Here is a simple chart which lists the Property ID (HW#)and the date it was sampled. I included notes to indicate the end of the sample week. I hope this helps give you a better sense of which properties will be included in each of the upcoming data "rollouts."

I realize that it is difficult to track the status of each of the HWs individually - since each one will be in numerous SDGs for the vaious analyses. I am hoping that we can use the Scribe database to help us confirm where we have and don't have data results. We will then need to confirm that the project level reviews and final reviews have been completed for each. Based on earlier discussions wuth the SERAS folks, I believe that once the final qualifiers are entered into Scibe we will consider the data "final." I will follow-up on this to confirm.

I will keep you posted on our progress on this end.
Thanks again for your help - Kelley
